

A LITTLE HISTORY...

In 1977, our founder experienced the need for a new service. At this time, severely sunken and raised concrete was torn out and re-poured. Randall Greene coined the phrase "Concrete Leveling" and developed tools and techniques that allow us to reposition concrete slabs and save residential and commercial customers time and money.

For the past three decades, the Green Company has served over 60,000 customers in Northeastern Ohio. Our customers realize that with time and experience comes quality and integrity. Because the Green Company is truly the original Concrete Leveling company, we possess skills and techniques that smaller, less experienced companies lack.

It is our commitment to doing things the right way, the first time, that allows Green Concrete Leveling to save customers money while providing an unrivaled Five Year Warrantee. Exceptional customer satisfaction and a superior reputation has allowed the Green Company to grow each year since 1977. Now that we have perfected our craft, we are pleased to invite you to consider becoming a part of our livelihood.

APPLICATIONS OF CONCRETE LEVELING:

- Sidewalks
- Driveways
- Patios & Porches
- Swimming Pools
- Garage Floors
- Slab Homes
- Basements
- Warehouse Floors
- Streets

To Whom it May Concern,

This brochure contains information about a franchise opportunity that has unlimited potential to supplement your already successful business.

Please take a look at this information, keeping in mind that we hand-picked you because your market has an unmet demand for this service. Thank you very much for your time.

Sincerely,
 Randall Greene
 Founder/President

Stop letting demand pass you by.

CONSIDER ADDING CONCRETE LEVELING TO YOUR REPERTOIRE

Green Concrete Leveling Co., Inc. began offering franchises for sale in late 2008. We wish to expand slowly to maintain standards of quality, but your market, and particularly your company, caught our eye.

Our corporation, R. Greene Concrete Leveling Co., is a family-owned business founded in 1977. Over the past three decades, demand for our services has grown tremendously, resulting in consistent growth and expansion each season. In order to satisfy the demand for concrete leveling throughout the U.S., we began to offer franchises under a new corporate name, Green Concrete Leveling Co., Inc. Only the most qualified service business in each target market is receiving this proposal.

THE GREEN ADVANTAGE

- RAISING AND LOWERING CONCRETE
- UNMATCHED WARRANTEE
- 32 YEARS OF SUCCESS IN BUSINESS
- IMMACULATE REPUTATION
- ENVIRONMENTALLY FRIENDLY
- CONSERVES NATURAL RESOURCES

the quality service your market needs

THE PROCESS

Concrete leveling is a labor intensive process that consists of both manual leveling and mudjacking. Manual leveling is a service exclusive to Green Concrete Leveling and is used to level stamped concrete, sandstone, and to lower concrete surfaces that have heaved upward. This is often the best solution.

Mudjacking (aka Slab Jacking or Pressure Grouting) involves drilling 1" diameter holes in the low areas of concrete surfaces and using hydraulic buggy pumps to force a dense grout material through the holes and under the block. This fills any voids and uses pressure to literally pump up the concrete to its original position.

UNLIMITED POTENTIAL

It has been truly amazing to see concrete leveling grow in demand and application since we coined the term in 1977. We know that this high-quality, cost-saving service is needed everywhere concrete exists, so we are excited to share our knowledge and experience with successful businesspeople through the process of franchising.

We firmly believe that this is an opportunity to create a mutually beneficial relationship between the original concrete levelers and hard-working people who will excel with our learnable methods. This franchise can stand alone as a business or be used to supplement an existing business.

WHY SUPPLEMENT MY BUSINESS?

Business owners are realizing that when the economy is slow, you rely on the services that your customers always demand. Concrete leveling is always needed because of weather, home inspections, poor drainage, and new construction.

CONTACT US
